

Achtung, Gronau! Taschendiebe schlagen in Geschäften zu!

In Gronau wurde am 27.09.2024 ein Einkaufsbesucher bestohlen. Die Polizei warnt vor zunehmenden Taschendieben in Märkten.

In Gronau, an alarming streak of pickpocketing has emerged, with the Kreispolizeibehörde Borken amping up warnings to the public. On September 27, between 15:45 and 16:05, criminals capitalized on crowded settings, striking with precision during unsuspecting moments of contact. These brazen thieves only require fleeting seconds and a strategic distraction from an accomplice to snatch personal belongings, leaving victims bewildered and cashless.

The police have noted a disturbing trend: these thefts predominantly occur in grocery stores lacking video surveillance, making it easier for culprits to escape without being caught. Citizens are urged to remain vigilant and guard their belongings closely during busy shopping hours to thwart these slick operators.
